PKG-IS-171-A

RI-SERIES™

TACTICAL MOUNT KIT AVAILABLE

OPERATING INSTRUCTIONS

1. Battery requires a full charge prior to operating.
A fully drained battery takes up to 6 hours to charge.
2. Unscrew end cap and put battery positive end first, screw end cap back on securely.
3. Modes: High, Medium, Low & Strobe
4. To change modes, turn flashlight off and back on within 5 seconds.
After 5 seconds flashlight will revert to previous used mode.
5. A low battery will run all modes in low (or less).

PRECAUTIONS

- Do not shine directly in eyes. High intensity LED's can damage eyesight instantly.
- Ensure flashlight end cap is screwed on tight.
- End cap O-Rings need a light coat of oil to seal correctly.
- Flashlight body can get very warm while using on high.
